### Monday

The first day covers all the basics and provides an overview of the course. There will be lots of opportunity to make sure you have the correct hold and grip correct and that you can measure the key frequencies using the LA. You will practice testing human compatibility with common items and discuss relationship of resonance with different energy fields.

### Tuesday:

Today will focus on food and nutrition testing and how to check for allergies and sensitivities, Issues of weight loss and eating disorders may also be covered. We will cover standard techniques to be able to design precise eating regimes for weight loss. We will also look at checking medication to minimize side effects and establish the optimal nutritional programme for anyone. The LA will help you to find the correct balance of medication, dosage, timing and duration to minimize side effects and maximize effectiveness of required pharmaceutical drugs.

### Wednesday:

Today we concentrate on learning to differentiate between different energies and measuring human compatibility. We will introduce some simple techniques to help restore global alignment and begin “questioning” at the four body levels: - physical, mental, emotional and etheric.

We will also introduce you to acupuncture techniques to stimulate, tonify and sedate meridians pathways using the LA. The afternoon will involve a field trip to practice LA exercises and to identify and measure environmental aggressions - how to detect them and correct Geopathic and ambient tensions using the LA. By the end of the day you should have an understanding of the significance of the Cosmic and Telluric connections and identify multiple environmental aggressions which can be mitigated or eliminated using the LA.

**Thursday:** Today we will explore the emotional and psychological fields and how to communicate at these levels in order to find specific solutions for the individual. We will consider what these fields mean to the overall balance and how to determine links with past traumas, family, hereditary, or cultural determinants and personal core beliefs. We will discover a variety of personalized solutions that can be used to realign the energy fields for optimal balance and effectiveness this allows us to dig deeper into the unconscious aspects of man and connect beyond time and space.

**Friday:** Today we will explore the difference between a global and specific realignment procedure and deeper energy fields - so that we can begin to treat pathological issues and disease by correcting imbalances at a cellular level. Based on the practice through the week, you should be able to confidently measure the person’s requirements and find the right quality and balance for the person

**Saturday:** This is a chance to bring the week full circle by looking at the deeper energy fields, organs, systems, glands and mental fields and questioning techniques and how it all fits together.
