

The Bio resonance CDs

Standard Cymatics Treatment Protocols for personal use.

This document contains information back ground documentation and details of the CD collection for Sound health and the DNA Recoding Set.

Wherever there is illness or injury, in-harmonic frequencies can be detected. even before they show up as symptoms in the body.

Sound Health ~ Sound Medicine© Medicine for the 21st century

These Cymatics Protocols have been developed to help restore and maintain health in the body and are captured on Compact discs to make it easier for people to experience the healing benefit of the sounds. They contain frequency specific modulated sounds to enhance cellular health and vital energy. The sounds are recognized by the body as the optimal resonating frequencies. Through a process of resonance, the sound patterns help to tune the body back into its natural state of health and well being. This is preventative health care, restoring

balance and harmony, while encouraging optimal well being.

The healing and transformational effects of sound have been known for centuries. The advanced technology used in these Bio resonance protocols encourages vibrational entrainment at a cellular level. Many thousands of people worldwide have experienced the healing effects of Cymatics ~Bio resonance therapy. Now standard Protocols have been developed to provide a system people can use at home to improve and maintain their health. Sound health ~ Sound Medicine© offers an expanding range of CD Protocols, ideal for Professional and Personal use.

The healing effects of sound have been known for centuries. The advanced technology used in Bio resonance protocols encourages vibrational entrainment at a cellular level. Many thousands of people worldwide have experienced the healing effects of Cymatics Bio resonance therapies. Now standard treatment protocols have been developed to provide a home use system that anyone can use to improve and maintain their health.

Electromagnetic and Sound wave technology has been embraced by the medical profession for its potential in advancing diagnostic and treatment procedures. One of the most exciting applications of Cymatics Bio resonance has been in the field of youth and beauty. Sound wave technology can be used to help reverse the aging process. Russia, Germany Bulgaria and Japan are leading the way in research. Non Surgical procedures and scanning devices are increasingly common place and are born out of Cymatics research. Thousands of people world wide have benefited from this new form of medicine.

Sound Medicine© Protocols; contain standard technology for the restoration and maintenance of cellular health. Used by Cymatics and Bio resonance practitioners' world wide, to alleviate specific health problems and injuries they have been extensively researched and can support recovery from a wide range of health problems.

The frequency specific modulations help to reinforce the body's natural healing capacity by providing an infrastructure of sound which entrains the body back to its correct frequency pattern and the body is therefore more easily able to eliminate destructive or in-harmonic frequencies of disease. They can be applied directly to the body using a specially designed applicator, or listened to while you are working or sleeping or driving. We recommend that you stay within 4 feet (1.5 meters) of the speakers or contact us for information about how to obtain an applicator: info@quantum-change.co.uk

These Protocols enhance the innate frequency of your individual organs and tissues and help restore your essential energy and **sound health** of the body. The sounds included on the CD's replicate the sub audible tones, tempo and patterns for different aspects of human physiology and neurological brainwaves. Animals can also benefit from some of these Protocols and we will be releasing specific Protocols for treating domestic animals: Contact: info@quantum-change.co.uk for information about treating your pets and other domestic animals.

Each CD addresses some of the most common health issues to provide a home treatment program for sufferers. It also includes 'back up' frequencies for people undergoing medical intervention, hospitalization and surgeries. We recommend their use, before and after surgery or invasive medical treatment/ medications. We believe these provide the pattern of frequencies required to restore and strengthen the body and thus assist recovery. We recommend that you use them in conjunction with any medical treatment program - to minimize side effects and help accelerate recovery. Always discuss any changes to your health

regime with your health care advisor.

How to use:

Sound Health - Sound Medicine© CDs can be played through a Home stereo or CD player, with or without headphones. Additionally, there are a range of applicators on the market which allow the sounds to be carried into the body. We believe that it may be most beneficial to apply the sounds in close proximity to the injured site; e.g. if you have a fracture, place the applicator directly on the location or as close to the injury as possible. There are a number of ways that the sounds can affect the body. You may apply through meridians channels or the palm of hand. Some people prefer to use foot plates. If you are bed bound, the treatments can be played through your pillow or used as background music, played on a low volume while you sleep. **Playing the discs quietly in the background while you carry out your normal activities will provide a constant reinforcement of the sounds and help to entrain cellular activity towards vibrant health.**

A trained therapist can advise you on the best application method for your particular problem. If you have any particular questions regarding the usage and application of Sound Medicine or Sound health CDs, please contact info@quantum-change.co.uk

Cymatics Medicine was developed in the 1950's by Sir Peter Guy Manners, MD; D.C.M. Dr Manners was engaged in research and development of sound wave technologies for more almost half a century until his retirement in 2006. He believed that applying therapeutic frequencies, directly through the skin, produced an immediate cell recognition which is both soothing to the body and able to restore natural health.

Medical disclaimer:

These CD Protocols are available for professional and personal use both. Cymatics -Bio

resonance has been tested extensively and no unwanted side effects have been detected. Our goal is to work in harmony with the medical profession. We recommend that you discuss the CDs of your choice with your health care professional. Under no circumstances should anyone ignore medical advice and if you think you may have an undiagnosed health problem always consult a Health care Practitioner.

"Within a few years of time we will be able to prevent this slowing down of cell replacement. And this can all be done with sound. If we take a frequency sample of your DNA at age 18, and save it, then later, if we transmit this frequency to your cells, they will rejuvenate."

-Sir Peter Guy Manners, M.D.DCM

The DNA Re-coding Series

We now have the technology to capture the sound wave patterns of Human DNA. Whilst the study is on-going, the DNA Re-coding Series presents the listener with the standard DNA Codex frequency patterns found in Human DNA cells. They are designed to offer a complex series of sound medicine that acts like a biological echo, and will be recognised by your body, as its inherent natural sound pattern. Absorbing these by listening or applying directly to the body, can trigger cellular memory to renew and restore its inherent state of health and well-being

"The elegance of DNA is far beyond your comprehension. It contains the history of the universe, of you, and of the primary issues of your being. It is responsive to your thoughts and actions and waits patiently for activation. It is the core interactive architectural structure of life in the universe, and is profoundly spiritual." Kryon 2006

Based on more than 25 years of Cymatics scientific research, we have now developed the technology to capture the sounds of Human DNA.

The DNA Re-coding series of discs provide a complex series of sound medicine that acts like a biological echo in your DNA. Each individual track contains multiple layers of natural sound frequencies that have been re-mastered and overlapped to contain audible and inaudible sound modalities to help reinforce the standard quality of Human DNA.

The CDs are sold separately or together as a set. Each is interconnected in such a way that listening in sequence offers a full integration of the sound vibration. You may be drawn to a particular CD to reinforce aspects of DNA that are more relevant to you. The full playing time is about 140 minutes about 35 minutes per disc. They have been broken down into 4 sections for ease of listening. They can be played quietly in the background while you are sleeping or

working.

These are not like musical recordings so do not worry if you don't like the sound. You don't have to like the sounds for them to have a positive effect.

Although inter-related, individually, each layer contains specific energies which have been categorized to allow you to choose a particular focus for your health and well being. Choose to buy the set or select an individual CD:-

Science of DNA

97% of our DNA is non chemical and electromagnetic in nature. This has been called junk because it was not visible under a microscope; it is multidimensional and transcends time and space. The first three layers concern our biological make up and the rest is slowly revealing itself. DNA is the carrier of all your history and operates at a quantum level Researchers in Russia joined forces with Linguists and Geneticists to study this subset of DNA. According to their findings, our DNA is not only responsible for the construction of the body, but it is also a communication and data storage system par excellence.

"It is a superconductor and uses a form of hyper communication and it speaks our language."

Molecular biologist and Biophysicist, Pjotr Garjajev and his colleagues explored the vibrational behavior of DNA and discovered that living chromosomes function like a holographic computer, using endogenous DNA laser radiation. This means they managed to modulate certain frequency patterns onto a laser ray and with it influenced the DNA frequency and thus genetic information itself. Our DNA reacts to sound wave frequencies which vibrate at the same wave pattern as is contained within our DNA. To prove it they have been developing devices that can influence cellular metabolism through suitably modulated radio and light wave frequencies and thus repair genetic defects - *taken from "Vernetzte Intelligenz" written by Grazyna Fosar Franz Bludorf (ISBN 3930243237).*

Cymatics Bio resonance ~ the Science of Sound

In Germany, researchers took the DNA of a 17-year-old boy, recorded its sound frequencies, and saved them. The boy was accidentally killed, but the scientists still had his DNA frequency patterns. Later, the DNA frequencies of the 17-year-old were transmitted into the body of a man in his late thirties. And the man almost became the young boy. His skin became youthful, he became slim, and his hair went back to its natural colour. Today he's in his forties and he still looks like a much younger man.

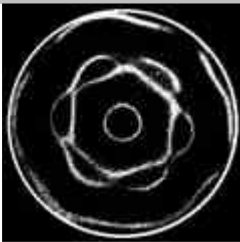

-Sir Peter Guy Manners

In the early 18th century, the German physicist Ernst Chladni, the "father of acoustics," covered plates with thin layers of sand, set them vibrating, and observed the patterns that were made in response to different sound stimuli.

In 1967, nearly three hundred years later, Hans Jenny, a Swiss doctor, artist, and researcher, published *Cymatics - the Structure and Dynamics of Waves and Vibrations*. In this book, published in both German and English, Jenny, like his precursor, showed what happens when one takes various materials like sand, water, or iron filings, and places them on vibrating metal surfaces.

When this is done, shapes and motion-patterns appear. Some of these patterns are nearly perfectly ordered and are stationary. Others develop in a turbulent, organic fashion, and are constantly in motion.

Jenny used crystal oscillators, and invented what he called a "tonoscope" to set his plates and membranes vibrating. One of the most fascinating discoveries he made was that the vowels of Hebrew and Sanskrit, when toned into his media, formed the actual patterns of the letters themselves! Modern languages did not have this effect. All of which leads to the speculation that there may be some truth in the concept of a "sacred language" — an actual, physical reason why the recitation of sacred mantras and texts may have real healing properties.

Jenny thought that evolution was a result of vibrations, with the vibrations of

one level of organization, such as that of cells, each one unique, combining to create glands and organs and so on, and each new level being a harmonic of the previous one. Jenny saw that we could heal the body with sound by understanding how different frequencies influence the genes, cells, and organs of the body

Out of Jenny's work, and that of other scientists in the late fifties, came the reality of using sound to transmute diseased cells into their healthy counterparts.

Dr. Manners, inspired by the work of Hans Jenny, began a search to recreate the forms and shape of anatomy and physiology using sound. Out of his observations came Cymatics, or Bio resonance, therapy - the use of sound to transform diseased tissue into its healthy counterpart. Cymatics probes are used to transmit bio resonance energy, in the form of electronic pulses, from the Cymatics instrument directly to human tissue. Another method of application is through fluids. Water or a homeopathic preparation is placed on a Bio resonance Energizer, which imprints the bioenergetics patterns into the solution. Also, there are units which can transmit bioenergetics patterns into a bathtub or hydrotherapy unit. Yet another unit combines bioenergetics frequencies with colour. Modern science tells us that there is no difference between the energetic pattern of an object and the object itself. We are made of energy. *If we transmit a healthy frequency into diseased tissue, we cause it to take on the frequency – and thus, the actuality – of healthy tissue.*

When asked what brings people to Cymatics therapy, Dr. Manners said, "They choose it because a tremendous percentage wants to avoid taking medication." And he stresses that, at least in the U.K, Germany and Russia. Cymatics has earned scientific recognition. "Scientists like it because its techniques can be explained and quantified, and the results are predictable. We know scientifically what will happen," Manners said, "if we transmit a certain combination of frequencies into the tissue."

"Cymatics therapy uses sound waves within the audible range to stimulate natural regulatory and immunological systems and to produce a near-optimum metabolic state for a particular cell or organ". Dr. Sir Peter Guy Manners
